02:00–05:00	40dB

Noise levels should be measured as $dB LA_{eq}$, with an averaging period of five minutes, in a free field position (defined as 3.5 metres from any reflecting surface other than the ground at a height of 1.2 to 1.5 metres).

The noise sensitive locations are:

In addition between 02:00 and 09:00 Thursday to Sunday 'noise' from the event should not be 'audible or discernable' within any occupied permanent structure where people normally reside or sleep, when assessed with windows and doors closed. In these conditions:

- 'Noise' is defined as sound which is created by entertainment consisting of either vocal (recorded or live) or instrumental music (recorded or live) or a combination of both.
- 'Audible or discernable' is defined as 'noise' which is distinct above the general hubbub of activity on the site which can be identified by the human ear as originating from discrete sources from the licensed site.

Any testing of sound equipment will not take place before 09:00 and will last for no more than 2 hours on any one day.

Prominent, clear and legible signage (in not less than 32 font bold) shall be displayed at all exits to the premises requesting the public to respect the needs of local residents and to leave the premises and the area quietly.
